

BSGI Annual Gynaecology and Imaging Meeting

Friday 5 April 2019

The aim of this joint meeting is to provide a focused day of clinically relevant talks across a range of areas including gynaecological oncology, benign gynaecology and early pregnancy. The live scanning session will provide delegates with a unique opportunity to see the latest developments and technologies in clinical practice.

Who should attend:

- O&G trainees
- Consultants in both Gynaecology and radiology
- Sonographers and specialist nurses
- Radiology trainees with an interest in gynaecological imaging

Programme highlights:

- Use of imaging to manage different urogynaecology problems
- Oncology - Ultrasound staging in gynaecological malignancies
- Early pregnancy complications and PUL
- Fibroids update - Focused ultrasound therapy
